

# High temperature glue VM 17

## Information

### Property:

- beige liquid
- incombustible
- high temperature resistant up to 800°C  
(experienced values are available only in connection with glass fabric)
- pure inorganic
- solid particle content (1h/100°C) = 67%
- pH-value, app. = 8,5
- liquid media = water
- weight, 25°C = 1,7 kg/l

### Processing instructions:

- before use stir up well
- dry in open air, temperature can speed up the drying process, has however to be tested individually

### Storing instructions:

- to be stored free of frost, between 5 – 35°C
- hazards identification number acc. to VbF: none (non inflammable)

### Durability:

- 6 months in dense closed container

Information, details, and data of our data sheet are according to the best of our knowledge and experience and are information only without obligation. We recommend due to the multitude of possible influences during processing and application of our product, to carry out tests according to your specific conditions.
